ELIZA · User Story Map v1

End of Sprint 1 · Jira project KAN on 27/10/2026 · Badges: story points · feature · jira key · Sprint 1 stories estimated with planning poker (55 points); later stories are estimated at their sprint planning · Dashed cards: backlog, not committed

Requirement

An information assistant on the EU AI Act for technical teams at EdTech providers: they find which provisions relate to their education AI system and what they require, in plain language and always with the cited source (consolidated text of 27/07/2026), without a legal verdict.

Product: what the user does with the assistant

Project work that builds and measures the product

Features

- F1 Ask in their own words
- F5 Guided start *(backlog)*
- F2 Find the relevant provisions
- F3 Plain-language answer
- F7 Follow-up questions *(backlog)*
- F6 Check the source
- F4 Boundary notices
- Privacy safeguard (C-10)
- Project deliverables D1–D11 (charter, question sets, source corpus, design, releases, pilot and final evaluation) and the course's sprint documents

Epics

- Ask — KAN-15
- Find and Understand — KAN-16
- Show the Source — KAN-17
- Know the Limits — KAN-18
- Project charter and sprint reporting — KAN-27
- Evaluation — KAN-28
- Source corpus — KAN-29
- System design and delivery — KAN-30

Stories

Sprint 1 Pre-alpha
14/10–28/10

- As a Project Review Committee member, I want to see the assumptions, constraints, dependencies, resources and risks with their owners and checks, so that I can judge whether the plan can hold. — 8 SP · KAN-69
- As a Project Review Committee member, I want to see what the team delivers, when, and who is responsible, so that I can check that the plan fits the course calendar. — 8 SP · KAN-70
- As a Project Review Committee member, I want to see the problem, the users, the objectives with measurable success criteria and the scope of the assistant, so that I can decide whether to approve the project. — 13 SP · KAN-79
- As a Data Scientist, I want the backlog, the story map and the Definition of Ready and Done agreed before Sprint 2 starts, so that I know which stories I can start and when my work counts as done. — 5 SP · KAN-80
- As a Data Scientist, I want one stored copy of the consolidated text with its manifest and a list of the in-scope provisions, so that the index and the evaluation questions are built from the same source version. — 5 SP · KAN-67
- As a Data Scientist, I want the architecture, the chosen technologies and the reasons behind them recorded before Sprint 2, so that I can start building the baseline on agreed technologies. — 13 SP · KAN-81
- As a Data Scientist, I want to close my gaps in the Sprint 1 fundamentals with a learning spike, so that I can work on the RAG pipeline from Sprint 2. — 3 SP · KAN-82

Release Alpha 0.1
Sprint 2 · 18/11

- As an EdTech AI developer, I want to see which in-scope provisions relate to my use case, with their exact references and version date, so that I do not miss a requirement that may concern my product. — – SP · F2 · KAN-8
- As a Project Review Committee member, I want to see how each Sprint 1 review comment changed the charter, so that I can approve Charter v2. — – SP · KAN-89
- As a Project Review Committee member, I want the final user stories with a test for each one and an estimated, prioritized backlog, so that I can check that every story can be verified. — – SP · KAN-90
- As a Project Review Committee member, I want to open one welcome page that links to every Sprint 2 deliverable and shows the sprint goal, the results and the submitted commit, so that I can review the sprint without searching the repository. — – SP · KAN-91
- As an EdTech AI developer, I want to be tested on in-scope questions about the four education use cases, each checked against the official text, so that I can see how often it cites the expected provision before I rely on it for my own product. — – SP · KAN-65
- As a compliance officer in an EdTech provider's legal team, I want the assistant to be tested on legal-decision, out-of-scope, insufficient-evidence and adversarial questions, scored against a written rubric, so that I know how it responds when users ask beyond its limits. — – SP · KAN-83
- As a Data Scientist, I want every in-scope provision stored as its own chunk with its Article or Annex reference and the version date, so that retrieval and citations can be checked against the source text. — – SP · KAN-86
- As a Project Review Committee member, I want to see how often the most basic retrieval finds the expected provision, compared with the target in the charter, so that I can judge whether the project starts from a measured baseline. — – SP · KAN-87
- As a Project Review Committee member, I want the design document, the software bill of materials and the interface mockup to match the system as it is built in Sprint 2, so that I can review every decision and every model the team used. — – SP · KAN-88

Release Beta 0.5
Sprint 3 · 09/12

- As an EdTech AI developer new to the AI Act, I want to describe my product and ask my question in my own words, so that I can find the relevant provisions without knowing article numbers or legal terms. — – SP · F1 · KAN-19
- As a technical lead taking part in the pilot, I want to open the assistant in a web browser without installing anything, so that I can try it during the pilot with my own questions. — – SP · Interface · KAN-21
- As an EdTech AI developer, I want the assistant to explain the relevant EU AI Act requirements in plain language, so that I can understand what they mean for my product without interpreting legal terms on my own. — – SP · F3 · KAN-4
- As a compliance officer in an EdTech provider's legal team, I want the assistant to show the relevant articles with their requirements and applicable exceptions without giving a legal decision, so that developers come to legal reviews already knowing which articles relate to their product. — – SP · F4 · KAN-2
- As an EdTech AI developer, I want the assistant to tell me when my question is outside its scope, so that I do not rely on an unsupported answer as regulatory information. — – SP · F4 · KAN-5
- As an ML engineer at an EdTech provider, I want the assistant to say when the provisions it found do not answer my question, so that I am not misled by a guessed answer. — – SP · F4 · KAN-23
- As a compliance officer in an EdTech provider's legal team, I want the assistant to refuse requests to evade the AI Act and to keep its rules when users try to override them, so that developers are not misled by manipulated answers or helped to work around the law. — – SP · F4 · KAN-24
- As a compliance officer in an EdTech provider's legal team, I want users to see that the assistant gives regulatory information and not legal advice, so that they do not mistake its answers for legal decisions. — – SP · F4 · KAN-25
- As a technical lead at an EdTech provider, I want the assistant to warn me about entering personal information and to tell me how my questions are handled, so that I can avoid disclosing student or staff data. — – SP · C-10 · KAN-26
- As a Project Review Committee member, I want to open one welcome page that links to every Sprint 3 deliverable and shows the sprint goal, the results and the submitted commit, so that I can review the sprint without searching the repository. — – SP · KAN-171
- As a Project Review Committee member, I want a larger question set with new questions from the baseline errors, so that the beta is measured on more cases while the held-out questions stay untouched. — – SP · KAN-170
- As a Data Scientist, I want to install and run the whole assistant, user interface included, from one README, so that I can check that the pipeline works end to end. — – SP · KAN-168
- As a Project Review Committee member, I want every experiment compared with the Sprint 2 baseline and the beta measured against the charter targets on the same questions, so that I can see which configuration is best and whether the beta is ready for the pilot. — – SP · KAN-169

Release RC 1.0
Sprint 4 · 30/12

- As an EdTech AI developer building an AI-based exam-grading tool, I want to see from which date each relevant EU AI Act rule applies, based on the designated consolidated text, so that my team can plan our releases around the correct application dates. — – SP · F2 · KAN-3
- As an EdTech AI developer taking part in the pilot, I want the assistant's answers to be understandable without legal training, so that I can use them for my own education product without asking a lawyer to explain them first. — – SP · Pilot · O3 · KAN-72
- As an EdTech AI developer, I want to find the relevant AI Act provisions faster with the assistant than by searching the regulation myself, so that I can check my feature against the law without losing a working day. — – SP · Pilot · O1 · KAN-202
- As a compliance officer in an EdTech provider's legal team, I want to read the source text of each provision cited in an answer, so that I can verify the explanation before advising the development team. — – SP · F6 · KAN-22
- As a compliance officer in an EdTech provider's legal team, I want the assistant's citations to be confirmed on questions it has not seen before, so that I can trust that developers receive the right Article or Annex with the correct version date. — – SP · F6 · KAN-77
- As a compliance officer in an EdTech provider's legal team, I want the final safety test to show that the assistant never gives a legal verdict, so that I can allow our developers to use it without the risk of mistaking its answers for a legal decision. — – SP · F4 · KAN-75
- As a Project Review Committee member, I want to follow all of Sprint 4 from one welcome page, so that I can review the final product, its test results and the team's process without searching the repository. — – SP · KAN-204
- As an EdTech AI developer, I want to use a release candidate in which the problems found in the pilot are fixed, so that the system shown in the final demo is the one I can actually rely on. — – SP · KAN-203

Backlog
only if time allows

- As an EdTech AI developer new to the AI Act, I want to start from example questions and optionally choose my education use case from a list, so that I can ask a useful first question without knowing legal terms. — – SP · F5 · KAN-20
- As a technical lead at an EdTech provider, I want to describe our product once and then ask follow-up questions about it, so that I do not have to repeat the product details and receive answers relevant to the product I described. — – SP · F7 · KAN-6
